

HOSKY TOKEN

Doggie Doo Doo
(Brown Paw-per)

Introduction

Hosky Token (\$HOSKY) was created due to the lack of low-quality s**t coin meme tokens on the Cardano Ecosystem. We saw that such a great need existed and are here to fill that gaping hole as any good boy would. We bring absolutely nothing other than low-quality memes, no financial value, no promises of mastiff gains, no mind-beagle-ing technology¹, just doggo memes.

Technical De-tails

This is the section where you would normally find marvelous technological promises, only to have them be broken later, diagrams of howl much faster our token is, timelines that will be forever adjusted and doodads to woof ya. Well, we're a meme coin so we ain't gonna done did that. Technical is ot us as purebred is to mutt.

So What's the Point?

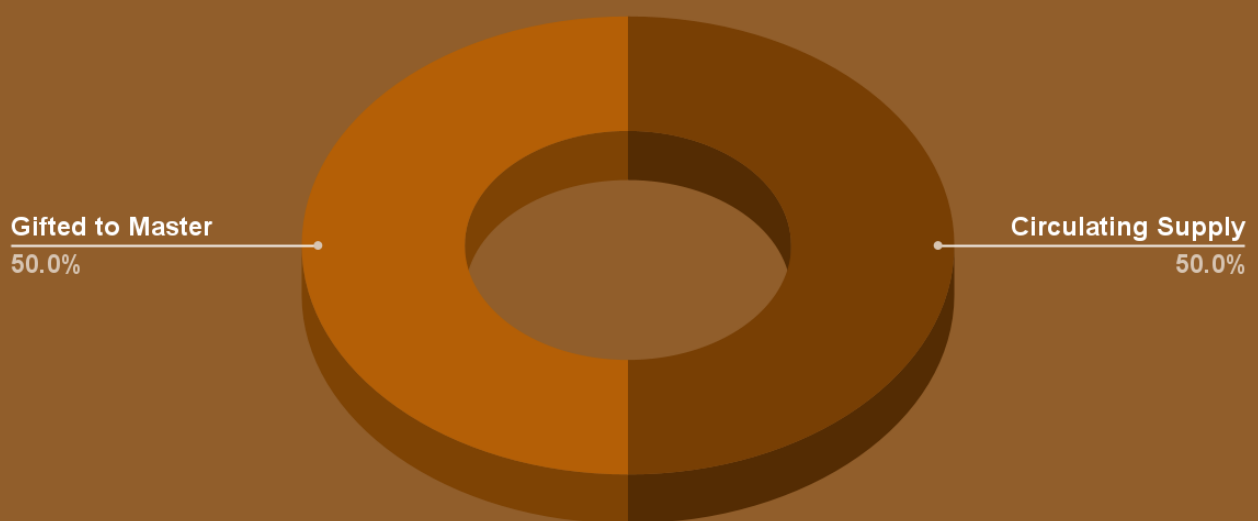

Memes, that is the point. If you get nothing else out of this brown paw-per please note this: *We are not here to make you doggone-rich, our goal is to make #memellionaires.* How? By aiming higher than any s**t coin has aimed before, no moon, no mars, we're going to Pluto! (the ex-planet planet, not the dog).

¹But does run on the amazing blockchain known as Cardano (ADA)

Tokenomics

Below you will find some obligatory graphs (no white(brown) paw-per is complete without em) that show the token distribution. Let's be real, we got better tokenomics than some of the larger non-meme chains out there, not only that but we have way more meme potential.

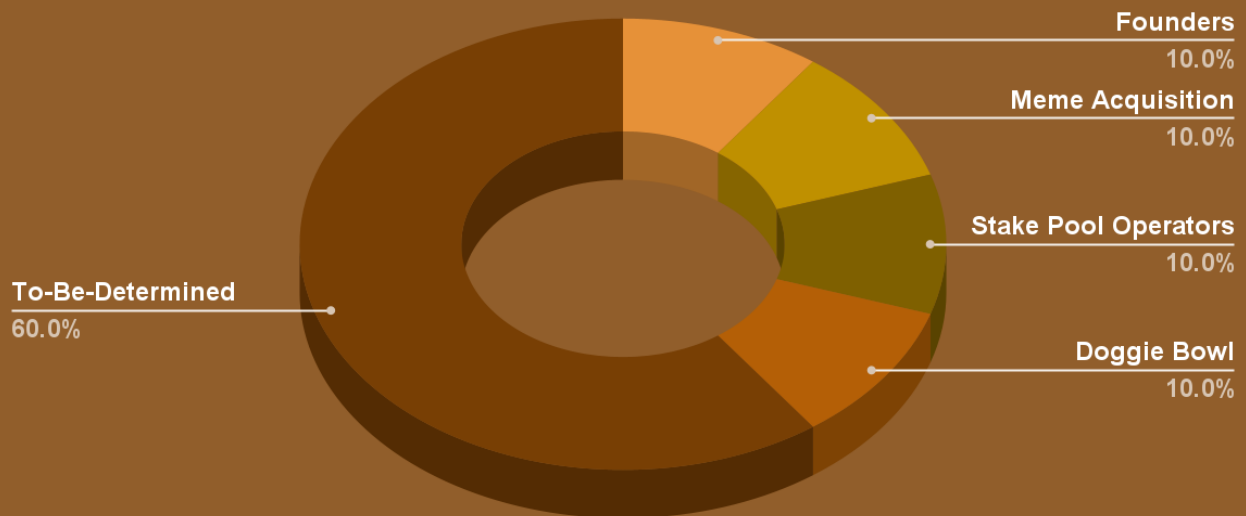

Initial Token Mint 1,000,000,000,000,000

In lieu of an original approach we decided to follow the pawprints of those that came before us, thus 50% of the initial tokens minted will be gifted to The Big Hosky Himself (if you don't know who this is do you even Cardano?). While we do not know what will become of these tokens we have faith

that Master will do good things with them, who knows, this might be the first time Master is ok with burning tokens. The other 50% will be allocated as shown by the following chart:

Circulating Supply 500,000,000,000,000

To-Be-Determined

60% of the supply has no designation at this moment; howl-ever, we plan to use all of our dexterous doggo brains to get this token into as many paws as paws-ible.

Meme Acquisition

10% of the circulating supply will be used to further grow the meme pool and to increase our meme howl-dings.

Stake Pool Operators

10% of the circulating supply will be allocated to SPOs for distribution, this does not mean you can expect a \$HOSKY Pool, but it also does not mean that it is completely out of the question, this is for the community to decide.

Doggie Bowl™

10% of the circulating supply will be available through the Doggie Bowl™ which is our token faucet available on hosky.io.

Founders

10% of the circulating supply has been sent as a treat to the wallets of the token founders, we have no intention of selling and plan to increase our howl-dings.
